HARVARD UNIVERSITY  
ARNOLD ARBORETUM

79<sup>e</sup> Famille. — JASMINÉES.

Fleurs régulières. Calice à 5-8 sépales, unis, persistants. Corolle à 5-8 pétales unis en long tube, à limbe étalé en coupe, à préfloraison imbricative. Etamines 2, incluses, adhérentes à la corolle. Capitel à 2 loges, devenant une baie ou une capsule bipartite. Graines 1-2, à embryon droit, presque sans albumen.
